Output(2023/08/21)
Changes:

- 1. If delivery to customer, Order Nmae becomes white on black. No change is required for delivery to STO.
 - 2. The retailer name and ship time are in a separate column.
 - 3. Expanded font size for barcode value.
 - 4. When a sub-order is selected, the corresponding CTN column becomes white on a black background, and the quantity and product name are bolded.
 - 5. If the Lead time of the order is Express/Epress+, then the Lead time section becomes white on black.
 - 6. The lower right corner of the mark shows the current order serial number/total orders.
 - 7. Add additional css processing for the height of the last page for print integrity.
- Solution: According to the pdf design, modify the font size, page layout

Output(2023/10/17)

- 1. Avoid printing pagination whenever possible.
 - 1. Remove the fixed width of the following fields: Qty, Product, Model, Size, Color, Material
 - 2. Reduce the font size of extra info: 35px => 25px, reduce the font size of ctn-order: 40px => 30px
 - 3. If the height of the print area is > height of the container (.print-display), hide [Extra Info + Product Sort Order(e.g. 1/4)].
- Note: Order: RBSE50607 is not reproduced. Order: RBSE50819 is reproduced.

#12 - 10/08/2024 10:57 AM - Xihua Fan
- Target version set to v3.0

#13 - 11/13/2024 03:14 PM - Zhongbao Ye
- Description updated

Output(2024/11/13)

1. Fixed mark print button
1. When opening the mark printing page multiple times, the print button on the page disappears.
Solution: Remove the button positioning logic in the third-party plug-in and directly use the inline style to fix the button.
