1. Update order_history: Only order_status is changed -> update order_history

Questions:

1. mobile (page 16): order detail 输入日期
1. 订单列表 日期选择
2. 订单列表 word 日期选择
- API 订单创建日期

v4 coding standard:

1. Git

#xxx(redmine number): xxx(redmine title) - xxx(项目)
2. 权限

2.1: 公共 -> 受保护 -> 私有

2.2: 项目 SBX
3. 模型

3.1: 模型系统

- 3.2: v3/v4model order.php, order_v3.php
4. twig, js, css (js, csscss)
5. MVCL (Lcn)
6. 1.

```
/**
 * xxx
 *
 * @copyright RedBlue-OTS 2024
 * @version v4
 *
 */
```

2. +

```
/**
 * xxx
 *
 * @param xxx $xxx
 * @param xxx $xxx
 * @return xxx
 */
```

Output

- Report and Solution

Output (2025/02/06 - 2025/02/08) (2025/01/21 - 2025/01/23), (2024/12/30 - 2025/01/8)

Done:

1. Functions:

- Desktop(slide out from right and 60vw), mobile(slide out from right and 100vw)
- Click any of order list will allow open order detail
- Add web/catalog/view/theme/default/stylesheets/svg/file-types/xxx.svg as the icon of files
- Add easyDingZhi.common.collapsible and use collapsible method to open/close order products. About the dynamic max-height, i add the resetHeight function to adjust the max-height of collapsible element. And it should be used when there are add/remove element in collapsible element.
- Edit mode: The init order detail won't allow edit anything(input, urgency, upload etc.) until click 'EDIT' button.
- Edit Urgency: (Desktop)Mouse hover and click event(like SBX), special case(Click the last remaining star will clear star for 'noraml' urgency(no star)). (Mobile)Add stars by click times (0 -> 1 -> 2 -> 0).
- Alert modal: 1. At least one order product alert. 2. Unsaved order detail alert
- Declaration element: The declaration element in order detail only for read(no matter if in 'EDIT' mode). The editable declaration element modal will display when clicking the declaration element in 'EDIT' mode.

- **Admin:** Add 'shipped' (whether display tracking info in order detail) and 'sort_order' in order status.
- Add model/common/files as common file functions: add getFileIcon(\$extension) for file icons in order detail.
- Still use v3's product data structure(product sub types), and we need to replace them after re-design v4 product tables.

- Use third-party [summernote] to replace textarea.
- Summernote-lite: Use the version of summernote without Bootstrap.
- Add easyDingZhi.common.summernote to support customize the functions of summernote.
- Modify some style of summernote since the original style is not suitable.

1. Summernote auto adjust the width of textarea when text too long.
 - Limit the width of summernote's editable area and do not allow auto-wrap.
2. Summernote mobile (mobile zoom in)

1. Common(UI): Order detail (sidepanel)
 - **Download attach files.**
 - **Upload/download/preview product proof image**
 - Upload/remove/preview attach files.
 - Select text has conflict with click event(open order detail)
 - (oooooooooooooooooooo)Remake, R, Not Cn, Sample first
2. Common(Edit/Remove): Order detail
3. Common(Add): Order detail

- Status changed from to
- % Done changed from 20 to 100
